

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE  
BOARD OF STUDIES (UG) OF STATISTICS**

**MINUTES OF THE BOARD OF STUDIES OF STATISTICS ONLINE MEETING  
HELD ON 31-07-2022 AT 4PM THROUGH GOOGLE MEET**

**AGENDA ITEM-1: APPROVAL OF STATISTICS (WM) SKILL ENHANCEMENT  
COURSE (5 TH SEM) SYLLABUS**

**STATISTICS (WM):** Approved STATISTICS (WM) SKILL ENHANCEMENT COURSE Syllabus with some modifications without disturbing the framework provided by you

**AGENDA ITEM-2: SCHEME & STRUCTURE OF QUESTION PAPERS**

**STATISTICS(WM):** Prepared , approved and request you to instruct the Paper setters to strictly follow the approved structure of the question papers

**AGENDA ITEM-3: MODEL QUESTION PAPERS**

**STATISTICS(WM):** Prepared and approved

**AGENDA ITEM-4: STRUCTURE AND EVALUATION OF PRACTICALS**

**(This should be applied for all the semesters with effect from 2022-23)**

- 1. Minimum 6 practicals should be conducted in each paper**
- 2. 3 practicals should be given in the practical examination**
- 3. 2 practicals should be answered**
- 4. Marks allotment ( Total 50 marks)**
  - a. 2 practicals each with 15 marks = 30 marks**
  - b. Record = 10 marks**
  - c. Viva Voce = 10 marks**

**All the above agenda items are accepted by the members of Board of Studies(UG)  
in Statistics Unanimously.**

**VIKRAMASIMHAPURI UNIVERSITY:  
NELLORE**

**MEMBERS ATTENDED TO THE THE BOARD OF STUDIES OF  
STATISTICS(UG)ONLINE MEETING HELD ON 31-07-2022 AT 4PM THROUGH  
GOOGLE MEET**

Sl. No	Name of the Member	Capacity	Signature
1	<b>Dr K.Sreenivasulu</b> Lecturer in Statistics DK Govt College for Women Nellore	<b>Chairman</b>	 31/7/22
2	<b>Prof. K.Rosaiah</b> Professor of Statistics Acharya Nagarjuna University Guntur	<b>External</b>	----
3	<b>Dr P.Maheswari</b> Lecturer in Statistics Govt.Degree College for Women, Srikalahasti	<b>External</b>	 31.07.2022

**REVISED UG SYLLABUS UNDER  
CBCS/SEMESTER(W.E.F 2020-21 ADMITTED  
BATCH) PROGRAMME: FOUR YEAR  
B.A/B.Sc.,  
Domain Subject: STATISTICS (WM)**

**SKILL ENHANCEMENT COURSES  
(SECS)FOR SEMESTER V, FROM 2022-  
23 (SYLLABUS-CURRICULUM)**

**STRUCTURE OF SECs FOR SEMESTER – V  
(To choose one pair from the three alternate pairs of SECs)**

Code	Courses 6 & 7	Name of the Course	Theory				Practicals		
			Hrs/ week	IE Marks	EE Marks	Cred its	Hrs/ week	Mark s	Credits
	6A	Operations Research - I	3	25	75	3	3	50	2
	7A	Operations Research – II	3	25	75	3	3	50	2
OR									
	6B	Statistical Process and Quality Control	3	25	75	3	3	50	2
	7B	Computational Techniques and R Programming	3	25	75	3	3	50	2
OR									
	6C	Econometrics	3	25	75	3	3	50	2
	7C	Regression Analysis	3	25	75	3	3	50	2

**Note-1: For Semester–V, for the domain subject Statistics, any one of the three pairs of SECs shall be chosen courses 6 and 7, i.e., 6A & 7A or 6B & 7B or 6C & 7C. The pair shall not be broken (ABC allotment is random, not on any priority basis).**

**Note-2: One of the main objectives of Skill Enhancement Courses (SEC) is to inculcate field skills related to the domain subject in students. The syllabus of SEC will be partially skill oriented. Hence, teachers shall also impart practical training to students on the field skills embedded in the syllabus citing related real field situations.**

**FACILITIES REQUIREMENTS FOR TEACHING THE SKILL  
ENHANCEMENT COURSES IN STATISTICS:**

**All the 6 courses mentioned as Skill Enhancement Courses require a computer lab with atleast 20 desk top systems since each student has to practice the methodology and acquire skills in producing output. This requires various software packages both standard (like Microsoft Excel, TORA/ LINDO/LINGO for Operations Research,) as well as open- source packages (like R and Python) to handle statistical analysis. Once these facilities are provided and training given on these lines, the outgoing students will fit into skill oriented jobs like business data analysts and Data Scientists.**

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE**  
**SEMESTER-WISE REVISED SYLLABUS UNDER CBCS, 2020-21**

**Four-year B.A. /B.Sc**

**Domain Subject: STATISTICS (WM)**

**SEMESTER-V**

**Course 6A: OPERATIONS RESEARCH - I**

**(Skill Enhancement Course (Elective), 05**

**CreditsMax. Marks: Theory :100 +**

**Practicals:50) (Hours: Teaching:75 hrs,**

**Training: 15 hrs)**

**Objective: The Objective of the paper is to introduce the basic concepts of Operational Research and linear programming to the students.**

**Learning Outcomes:**

**After learning this course, the student will be able**

1. To know the scope of Operations Research
2. To link the OR techniques with business environment and life sciences
3. To convert real life problems into mathematical models
4. To find a solution to the problem in different cases
5. To inculcate logical thinking to find a solution to the problem

**UNIT-I**

**Introduction of OR – Origin and development of OR, Nature and features of OR, Scientific Method in OR, Advantages and limitations of O.R, Applications of Operation Research.**

**Linear programming problem (LPP) -Mathematical formulation of the problem - illustrations on Mathematical formulation of Linear programming of problem. Graphical solution of linear programming problems**

**UNIT-II**

**General linear programming Problem(GLP)-Standard and Canonical forms of LPP, Definitions of Slack variable, Surplus variable, unrestricted Variable, Basic Solution, Degenerate Solution, Basic feasible Solution and Optimum Basic Feasible Solution.**

**Simplex Method- Introduction, Computational procedure of simplex algorithm. Solving LPP by Simplex method (Maximization case and Minimization case)(Two variables only)**

### UNIT-III

**Artificial variable technique - Big-M method and Two-phase simplex method (Simple problems only with two variables)**

**Concepts of Degeneracy in LPP, Alternative solution, Unbounded solution, Non existing feasible solution and Solution of simultaneous equations by Simplex method. (No problems required)**

### UNIT-IV

**Duality in Linear Programming- Concept of duality, Definition of Primal and Dual Problems, General rules for converting any primal into its Dual, Relation between the solution of Primal and Dual problem(statements only). Using duality to solve Primal Problems**

### UNIT-V

**Post Optimal Analysis- Changes in cost Vector C, Changes in the Requirement Vector B and changes in the Coefficient Matrix A. Structural Changes in a LPP.**

#### **Reference Books:**

1. S.D. Sharma, Operations Research, Kedar Nath Ram Nath & Co, Meerut.
2. Kanti Swarup, P.K.Gupta, Manmohn, Operations Research, Sultan Chand and sons, New Delhi.
3. J.K. Sharma, Operations Research and Application, Mc.Millan and Company, New Delhi.
4. Taha H.M: Operations Research: An Introduction : Mac Millan.
5. S.Kalavathy: Operations Research: Vikas Publications

**Practical/Lab to be performed on a computer using OR/Statistical packages  
Conduct at least 6 Practicals from the following**

1. Mathematical Formulation of LPP
2. Linear Programming Problem using Graphical Method
3. LPP with simplex method.
4. Charne's M - method.
5. Two Phase Simplex method.
6. Illustration of following special cases in LPP using Simplex method
  - (i) Unrestricted variables
  - (ii) Unbounded solution
  - (iii) Infeasible solution
  - (iv) Alternative or multiple solutions.
7. Problems based on Principle of Duality.
8. Problems based on Post Optimal Analysis.

**VIKRAMASIMHAPURI UNIVERSITY**  
**FOUR YEAR B.A./B.Sc DEGREE EXAMINATION**  
**(W.E.F 2020-21 ADMITTED BATCH)**  
**STATISTICS(WM)**  
**(SKILL ENHANCEMENT COURSES)**  
**SEMESTER – V**  
**Course 6A: OPERATIONS RESEARCH - I**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION – A**

**Answer any FIVE Questions :-**

**5 X 5 = 25M**

1. Describe the Origin and Development of Operations Research
2. A paper mill produces two grades of papers namely X and Y. Because of raw material restrictions it cannot produce more than 400 tonnes of grade X and 300 tonnes of grade Y in a week. There were 160 production hours in a week. It requires 2 and 4 hours to produce a tonne of products X and Y respectively with corresponding profits of Rs.2000/- and Rs.5000 per tonne. Formulate the above as LPP to maximize the profit
3. Explain the role of Slack and surplus variables in solving LPP
4. Define the standard and canonical forms of LPP
5. Explain the concept of degeneracy in LPP
6. Explain the Big M method in LPP
7. State the relations between solution of Primal and Dual Problem
8. Write the dual of the following LPP

$$\text{Maximize } z = x_1 - x_2 + 3x_3$$

**Subject to the**

$$\text{constraints } x_1 + x_2 + x_3 \leq$$

**10**

$$2x_1 - x_3 \leq 2$$

$$2x_1 - 2x_2 - 3x_3 \leq 6$$

$$x_1, x_2, x_3 \geq 0$$

9. Explain the case of changes in Requirement vector in Post Optimal Analysis
10. Mention the case of changes in Cost vector in Post Optimal Analysis

## SECTION – B

Answer any FIVE questions :-

5 X 10 = 50M

11. Define Operations Research? What are the applications of Operations Research?

12. Find the maximum value of  $Z=5X_1 + 7X_2$  using Graphical Method

Subject to the constraints

$$X_1 + X_2 \leq 4$$

$$3X_1 + 8X_2 \leq 24$$

$$10X_1 + 7X_2 \leq 35$$

$$X_1, X_2 \geq 0$$

13. Explain the Computational Procedure of simplex algorithm.

14. Solve the following problem using Simplex Method

$$\text{Maximize } z = 3x_1 + 2x_2$$

subject to

$$-x_1 + 2x_2 \leq 4$$

$$3x_1 + 2x_2 \leq 14$$

$$x_1 - x_2 \leq 3$$

$$x_1, x_2 \geq 0$$

15. Solve the following Linear Programming Problem using Big M method

$$\text{Maximize } z = -2x_1 - x_2$$

Subject to the

$$\text{constraints } 3x_1 + x_2 = 3$$

$$4x_1 + 3x_2 \geq 6$$

$$x_1 + 2x_2 \leq 4$$

$$x_1, x_2 \geq 0$$

16. Solve the following Linear Programming Programme using Two Phase Simplex method

$$\text{Maximize } z = x_1 + x_2$$

Subject to the

$$\text{constraints } 2x_1 + x_2 \geq 4$$

$$x_1 + 7x_2 \geq 7$$

$$x_1, x_2 \geq 0$$

17. Explain various steps in formulation of Dual Linear Programming Problem

18. Apply the Principle of duality to solve the LPP

$$\text{Maximize } z = 3x_1 + 2x_2$$

**Subject to the**

$$\text{constraints } x_1 + x_2 \geq 1$$

$$x_1 + x_2 \leq 7$$

$$x_1 + 2x_2 \leq 10$$

$$x_1, x_2 \geq 0$$

19. How to deal with the structural changes in LPP in post optimal situations

20. Discuss the effect on the optimum solution of the changes in the requirement vector for the following LPP

$$\text{Maximize } z =$$

$$2x_1 + x_2 \text{ Subject to the}$$

$$\text{constraints } 3x_1 + 5x_2 \leq 15$$

$$6x_1 + 2x_2 \leq 24$$

$$x_1, x_2 \geq 0$$

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE**  
**SEMESTER-WISE REVISED SYLLABUS UNDER CBCS, 2020-21**

**Four-year B.A. /B.Sc**

**Domain Subject: STATISTICS (WM)**

**SEMESTER-V**

**Course 7A: OPERATIONS RESEARCH - II**

**(Skill Enhancement Course(Elective), 05**

**CreditsMax. Marks: Theory :100 +**

**Practicals:50) (Hours: Teaching:75 hrs,**

**Training: 15 hrs)**

**Objective: To enrich the knowledge of students with advanced techniques of linear programming problem along with real life applications.**

**Learning Outcomes:**

**After learning this course, the student will be able**

1. To solve the problems in logistics
2. To find a solution for the problems having space constraints
3. To minimize the total elapsed time in an industry by efficient allocation of jobs to the suitable persons.
4. To find a solution for an adequate usage of human resources
5. To find the most plausible solutions in industries and agriculture when a random environment exists.

**UNIT -I**

**Transportation Problem- Introduction, Mathematical formulation of Transportation problem. Definition of Initial Basic feasible solution of Transportation problem- North-West corner rule, Lowest cost entry method, Vogel's approximation method.**

Method of finding optimal solution-**MODI method (U-V method)**, Unbalanced transportation problem. Maximization TP

**UNIT-II**

**Assignment Problem-Introduction, Mathematical formulation of Assignment problem, Reduction theorem (statement only), Hungarian Method for solving Assignment problem, Unbalanced Assignment problem.**

**The Traveling salesman problem-** Formulation of Traveling salesman problem as an Assignment problem and Solution procedure.

**UNIT-III**

**Sequencing problem- Introduction and assumptions of sequencing problem, Johnson's algorithm for n jobs and two machines problem- problems with n-jobs on two machines, Gantt chart, algorithm for n jobs on three machines problem- problems with n- jobs on three machines**

## UNIT-IV

**Network Scheduling- Basic Components of a network, nodes and arcs, events and activities– Rules of Network construction – Time calculations in networks - Critical Path method (CPM) and PERT.**

## UNIT-V

**Game theory- Two-person Zero-sum games, Pure and Mixed strategies, Maximin and Minimax Principles, Saddle point and its existence, Games without saddle point-Mixed strategies, Solution of 2 x 2 Games, Graphical method of solving 2xn and mx2 games(Algorithm only), Dominance property**

### Reference Books:

1. S.D. Sharma, Operations Research, Kedar Nath Ram Nath & Co, Meerut.
2. Kanti Swarup, P.K.Gupta, Manmohn, Operations Research, Sultan Chand and sons, New Delhi.
3. J.K. Sharma, Operations Research and Application, Mc. Millan and Company, New Delhi.
4. Gass: Linear Programming. Mc Graw Hill.
5. Hadly :Linear programming. Addison-Wesley.
6. Taha : Operations Research: An Introduction : Mac Millan.
7. Dr.NVS Raju; Operations Research, SMS education
8. S.Kalavathy: Operations Research: Vikas Publications

**Practical/Lab to be performed on a computer using OR/Statistical packages  
Conduct at least 6 Practicals from the following**

1. IBFS of transportation problem by using North- West corner rule, Matrix minimum method and VAM
2. Optimum solution to balanced and unbalanced transportation problems by MODI method (both maximization and minimization cases)
3. Solution of Assignment problem using Hungarian method (both maximization and minimization cases),
4. Solution of sequencing problem—processing of n jobs through two machines
5. Solution of sequencing problem- processing of n jobs through three machines
6. To perform Project scheduling of a given project (Deterministic case-CPM).
7. To perform Project scheduling of a given project (Probabilistic case-PERT).
8. Solution of m x n games by dominance rule.

**VIKRAMASIMHAPURI UNIVERSITY**  
**FOUR YEAR B.A./B.Sc DEGREE EXAMINATION**  
**(W.E.F 2020-21 ADMITTED BATCH)**  
**STATISTICS(WM)**  
**(SKILL ENHANCEMENT COURSES)**  
**SEMESTER – V**  
**Course 7A: OPERATIONS RESEARCH -II**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION – A**

**Answer any FIVE Questions :-**

**5 X 5 = 25M**

1. Explain the Mathematical formulation of a Transportation problem
2. Explain Least Cost method for obtaining IBFS of a Transport Problem
3. Explain the difference between Transportation and Assignment problem
4. Explain Mathematical formulation of travelling salesman problem as Assignment problem
5. Mention the basic assumptions underlying a Sequencing Problem
6. Explain Principle Steps in solving 'n jobs on 2 machines'
7. Define Network scheduling and explain the basic components activity and event.
8. Explain the rules of Network Construction
9. Explain the terms 'Pure strategy', 'Mixed strategy', and 'Pay off matrix' in game theory
10. Explain Dominance property in game theory

**SECTION –B**

Answer any **FIVE** Questions :-

**5 X 10 = 50M**

11. Find the IBFS for the following transportation problem by North-West Corner Method

Origin/Destination	1	2	3	4	Supply
1	11	13	17	14	250
2	16	18	14	10	300
3	21	24	13	10	400
Demand	200	225	275	250	

12. Find the IBFS by VAM and also determine the optimal solution by MODI method for the following Transportation Problem

Plant/Distribution centre	D1	D2	D3	D4	Supply
P1	19	30	50	12	7
P2	70	30	40	60	10
P3	40	10	60	20	18
Requirement	5	87	15	35	

13. Describe Hungarian method to solve Assignment Problem  
 14. Solve the following Assignment problem using Hungarian method

	1	2	3	4
1	18	26	17	11
2	13	28	14	26
3	38	19	18	15
4	19	26	24	10

15. Find the sequence that minimizes the total elapsed time required to complete the following jobs. Also find Idle times

Books	1	2	3	4	5	6	7
Printing time	3	12	15	6	10	11	9
Binding time	8	10	10	6	12	1	3

16. Find the sequence that minimizes the total time required for performing the following jobs on three machines in the order ABC.

Job	Processing times		
	Machine A	Machine B	Machine C
1	8	3	8
2	3	4	7
3	7	5	6
4	2	2	9
5	5	1	10
6	1	6	9

17. Explain various basic steps in CPM /PERT

18. A Project schedule has the following characteristics

Activity	1-2	1-3	2-4	3-4	3-5	4-9	5-6	5-7	6-8	7-8	8-10	9-10
Time(days)	4	1	1	1	6	5	4	8	1	2	5	7

**From the above information find a)Construct a network diagram**

b) Compute the earliest time and latest event time

c) Determine the critical path and total project duration

d) Compute total and free float for each activity

19. Explain the Maximax and Minimax Principle used in Game theory with example

20. Solve the following Pay off matrix. Also determine the optimum strategies and the value of the game

**B**

	5	1
<b>A</b>	3	4

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE**  
**SEMESTER-WISE REVISED SYLLABUS UNDER CBCS, 2020-21**

**Four-year B.A. /B.Sc**

**Domain Subject: STATISTICS (WM)**

**SEMESTER-V**

**Course 6B: STATISTICAL PROCESS AND QUALITY CONTROL**

**(Skill Enhancement Course(Elective), 05**

**CreditsMax. Marks: Theory :100 +**

**Practicals:50) (Hours: Teaching:75 hrs,**

**Training: 15 hrs)**

**Course Objectives: To understand the concept of quality, process control and product control using control chart techniques and sampling inspection plan. To have an idea about quality management, quality circles, quality movement and standardizations for quality.**

**Learning Outcomes:**

**After learning this course, the student will be able**

1. To define 'quality' in a scientific way
2. To differentiate between process control and product control
3. To speak about quality awareness in industry
4. To pave a path to an industry to meet the standards
5. To effectively implement various plans to control the quality standards at various stages of an industry.

**UNIT 1**

**Meaning of quality, concept of total quality management (TQM) and six-sigma, ISO, comparison between TQM and Six Sigma, Meaning and purpose of Statistical Quality Control (SQC), Seven Process Control Tools of Statistical Quality Control (SQC) (i) Histogram (ii) Check Sheet, (iii) Pareto Diagram (iv) Cause and effect diagram (CED), (v) Defect concentration diagram (vi) Scatter Diagram (vii) Control chart. (Only introduction of 7 tools is expected).**

**UNIT II**

**Statistical basis of Shewhart control charts, use of control charts. Interpretation of control charts, Control limits, Natural tolerance limits and specification limits. Chance causes and assignable causes of variation, justification for the use of 3-sigma limits for normal distribution, Criteria for detecting lack of control situations:**

- (i) At least one point outside the control limits
- (ii) A run of seven or more points above or below central line.

**UNIT III**

**Control charts for Variables: Introduction and Construction of  $\bar{X}$  and R chart and Standard Deviation Chart when standards are specified and unspecified, corrective action if the process is out of statistical control.**

#### UNIT IV

**Control charts for Attributes: Introduction and Construction of p chart, np chart, C Chart when standards are specified and unspecified, corrective action if the process is out of statistical control.**

**Acceptance Sampling : Introduction, Concept of sampling inspection plan, Comparison between 100% inspection and sampling inspection. Procedures of acceptance sampling with rectification,**

#### UNIT V

**Concepts of Producer's risk and Consumer's risk, Operating characteristic (OC) curve, Acceptable Quality Level (AQL), Lot Tolerance Fraction Defective (LTFD) and Lot Tolerance Percent Defective (LTPD), Average Outgoing Quality (AOQ) and Average Outgoing Quality Limit (AOQL), AOQ curve, Average Sample Number (ASN), Average Total Inspection (ATI).**

**Single Sampling Plan: Computation of probability of acceptance using Binomial and Poisson approximation, Determination of a single sampling plan by: a) lot quality approach b) average quality approach.**

**Double Sampling Plan: Evaluation of probability of acceptance using Poisson distribution, Structure of OC Curve, Comparison of single sampling plan and double sample plan.**

#### **Text Books:**

1. **Montgomery, D. C. (2008):** Statistical Quality Control, 6<sup>th</sup>Edn., John Wiley, New York.
2. **Parimal Mukhopadhyay:** Applied Statistics, New Central Book Agency.
3. **Goon A.M., Gupta M.K. and Das Gupta B. (1986):** Fundamentals of Statistics, Vol. II, World Press, Calcutta.
4. **S.C. Gupta and V.K. Kapoor:** Fundamentals of Applied Statistics – Chand publications.

#### **References:**

1. **R.C. Gupta:** Statistical Quality Control.
2. **Duncan A.J. (1974):** Quality Control and Industrial Statistics, fourth edition D.B. Taraporewala Sons and Co. Pvt. Ltd., Mumbai.
3. **Grant, E. L. and Leavenworth (1980):** Statistical Quality Control, fifth edition, McGraw Hill, New Delhi.

**Practical/Lab to be performed on a computer using Statistical packages  
Conduct at least 6 Practicals from the following**

1. Construction of  $\bar{X}$  and R Charts.
2. Construction of  $\bar{X}$  and  $\sigma$  Charts.
3. Construction of p Charts for fixed sample size.
4. Construction of p Charts for variable sample size.
5. Construction of np Charts.
6. Construction of C charts.
7. Determination of single sampling plan by: a) lot quality approach b) average quality approach.

**VIKRAMASIMHAPURI UNIVERSITY**  
**FOUR YEAR B.A./B.Sc DEGREE EXAMINATION**  
**(W.E.F 2020-21 ADMITTED BATCH)**  
**STATISTICS(WM)**  
**(SKILL ENHANCEMENT COURSES)**  
**SEMESTER – V**

**Course 6B: STATISTICAL PROCESS AND QUALITY CONTROL**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION – A**

**Answer any FIVE Questions**

**5 X 5 = 25M**

1. Explain the term 'Quality' in a scientific way
2. What is the comparison between Total Quality Management and Six Sigma
3. What are the uses of Control Charts?
4. Explain Chance causes and Assignable causes of variation
5. Describe Standard Deviation chart
6. What is the correction process if Mean and Range charts are out of control?
7. 20 tape recorders were examined for quality control test. The number of defects for each tape recorder are given below.

**2,4,3,1,1,2,5,3,6,7,3,1,4,2,3,1,6,4,1,1**

**Construct C chart and give the conclusions**

8. Distinguish between Defect and Defectives .What are the related Control charts?
9. Explain Producer's risk and Consumer's risk
10. Explain the Evaluation of probability of Acceptance using poisson distribution in Double sampling plan

**SECTION –B**

**Answer any FIVE Questions**

**5 X 10 = 50M**

11. Explain about the Process Control tools of Statistical Quality Control
12. What is the meaning and Purpose of Statistical Quality Control?
13. Justification for the use of 3-sigma limits for Normal distribution- Explain
14. Explain the Criteria for detecting lack of control situations to meet the standards of the Industry
15. A machine is set to deliver packet of a given weight. 10 samples of size 5 were recorded. Below are given relevant data. Construct Mean and Range charts and comment on the state of Control.

Sample No	1	2	3	4	5	6	7	8	9	10
Mean	15	17	15	18	17	14	18	15	17	16
Range	7	7	4	9	8	7	12	4	11	5

16. Distinguish between Control charts for Variables and Attributes
17. Explain the Construction of P chart with a)Fixed sample size b)Varying sample size
18. What is Sampling Inspection Plan, Compare between 100% inspection and sampling inspection.
19. Explain the determination of a single sampling plan using 1.Lot Quality Approach 2.Average Quality Approach
20. Describe the comparison between single and double sampling plans

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE**  
**SEMESTER-WISE REVISED SYLLABUS UNDER CBCS, 2020-21**

**Four-year B.A. /B.Sc**

**Domain Subject: STATISTICS (WM)**

**SEMESTER-V**

**Course 7B: COMPUTATIONAL TECHNIQUES AND R PROGRAMMING**

**(Skill Enhancement Course(Elective), 05**

**CreditsMax. Marks: Theory :100 +**

**Practicals:50) (Hours: Teaching:75 hrs,**

**Training: 15 hrs)**

**Course Objectives: To learn the statistical analysis with the help of the statistical software R**

**Learning Outcomes:**

**After learning this course the student will be able**

1. Understand the basic functioning of a computer
2. Acquire skills in handling business and organizational data using Excel
3. Perform simple analytics using Excel
4. Understand the power of R programming language
5. Handle various statistical issues using R language

**UNIT I**

**Computer basics: Basic applications of computer, components of computer system, Central Processing Unit (CPU), input and output units, computer memory and mass storage devices. Programming languages and their applications. Concept of files and folders. Software and types of software. Operating System like Windows and Linux.**

**UNIT II**

**Data processing using spreadsheets – Data entry and editing features in Excel, copy, paste, paste special options, sort and filter options, auto sum, steps of finding average and standard deviation of data using statistical functions. Matrix operations like transpose, multiply and inverse using Excel functions. Simple graphs like bar chart, line chart and pie chart in Excel. Exporting Excel output to word processors like MS-Word and slide presentations like Power Point.**

**UNIT III**

**Scatter diagram, fitting of straight line, polynomial and power curves using Excel – Reading R- square value and equation from the graph. Predicting future values using ‘forecast’ and ‘trend’ functions. Data Analysis Pak and its features. Performing Student’s t-test and one-way Analysis of Variance using Data Analysis Pak. P-value and its interpretation.**

#### **UNIT IV**

**Programming with R: Introduction to R, Data types in R (numeric, logical, character, complex etc.), R objects: vector, matrix, array, list, data frame, factor, and time series. Arithmetic, logical and relational operators, explicit and implicit looping, functions and functional programming in R, Lexical scoping rules in R, benefits of Lexical scoping, other scoping rules, debugging facility in R. Few important mathematical, statistical and graphical functions in R.**

#### **UNIT V**

**Descriptive Statistics with R software: Calculations with R software such as descriptive statistics, frequency distribution, Graphics and plots, statistical functions of central tendency, variation, skewness and kurtosis and illustration with examples.**

#### **Suggested Books**

**Practical/Lab to be performed on a computer using R Software**

**Conduct at least 6 Practicals from the following**

1. Construction of Bar Chart and Pie Chart using Excel
2. Fitting of straight-line using Excel
3. Calculating Matrix Inverse using Excel
4. One way ANOVA using Excel
5. Data visualization using R - frequency polygon, Ogives, Histogram.
6. Data visualization using R - simple and multiple bar diagram, pie chart.
7. Computation of Descriptive Statistics using R - Central Tendencies, Dispersions, Moments, Skewness and Kurtosis.
8. Computation of Karl Pearson's Coefficient of Correlation and Rank Correlation using R.
9. Construction of Control Charts for variables ( $\bar{X}$ R and  $\sigma$ ) charts using R.
10. Construction of Control Charts for attributes (p, np charts with fixed and varying sample sizes) using R.
11. Construction of Control Charts using R - C chart

**VIKRAMASIMHAPURI UNIVERSITY**  
**FOUR YEAR B.A./B.Sc DEGREE EXAMINATION**  
**(W.E.F 2020-21 ADMITTED BATCH)**  
**STATISTICS(WM)**  
**(SKILL ENHANCEMENT COURSES)**  
**SEMESTER – V**

**Course 7B: COMPUTATIONAL TECHNIQUES AND R PROGRAMMING**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION – A**

**Answer any FIVE Questions**

**5 X 5 = 25M**

1. Define Files, Folders and Software
2. Explain the Operating System with examples
3. Briefly explain about MS Excel
4. Explain exporting excel output to word processors with examples
5. Explain about p-value and its interpretation
6. During data analysis, how a researcher decide on the most appropriate descriptive and inferential statistics?
7. Explain what is R?
8. Explain Mathematical , Statistical and Graphical functions in R-Programming?
9. How do you export a descriptive statistics table in R?
10. How to load a data set , explain with a small example.

**SECTION –B**

**Answer any FIVE Questions**

**5 X 10 = 50M**

11. What are the four basic components of a computer system?
12. What is the use of programming languages and their application?
13. Explain Graphical and Diagrammatical representation in Excel with Examples
14. What are the steps of finding averages and Standard Deviation of data using Statistical function
15. How to fit a Straight line using excel with example.
16. What are the common features of data analysis, Explain?
17. What are the programming features of R? Why is R being used instead of Excel.
18. What do you understand by R-Objects? List out some most popular file formats used in R-Programming?
19. Explain Statistical functions of Central Tendency in R with examples
20. How to calculate skewness and Kurtosis in R with an example

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE**  
**SEMESTER-WISE REVISED SYLLABUS UNDER CBCS, 2020-21**

**Four-year B.A. /B.Sc**  
**Domain Subject: STATISTICS (WM)**  
**SEMESTER-V**  
**Course 6C: ECONOMETRICS**  
**(Skill Enhancement Course (Elective), 05**  
**CreditsMax. Marks: Theory :100 +**  
**Practicals:50) (Hours: Teaching:75 hrs,**  
**Training: 15 hrs)**

**Learning Outcomes:**

**The course on econometrics will primarily focus on the use of statistical modeling and the relevant analyses to economic data problems. After learning this course the student will be able understand**

1. various important econometric models and relevant model building concepts in econometrics
2. general linear models and estimation of inherent model parameters
3. multicollinearity, its detection and consequences and related inferential aspects
4. some advanced concepts of generalised least squares estimation, autocorrelation, its consequences, detection and strategy for reducing autocorrelation,
5. heteroscedasticity and its inherent concepts including its consequences,
6. some inferential aspects on heteroscedasticity,
7. practical aspects and real data illustration of the related problems.

**UNIT-I**

**Basic Econometrics: Nature of econometrics and economic data, concept of econometrics, steps in empirical economic analysis, econometric model, importance of measurement in economics, the structure of econometric data, cross section, pooled cross section, time series and paired data.**

**UNIT-II**

**Models and Estimations: Simple regression models- two variable linear regression model, assumptions and estimation of parameters. Gauss Markoff theorem, OLS estimations, partial and multiple correlations coefficients. The general linear model assumptions, estimation and properties of estimators, BLUEs.**

**UNIT- III**

**Heteroscedastic disturbances : Tests of significance of estimators, R square and ANOVA. Concepts and consequences of heteroscedasticity. Tests and solutions of heteroscedasticity. Specification error, Errors of measurement.**

## UNIT-IV

**Multicollinearity: The concept of multicollinearity and its consequences on econometric models, detection of multicollinearity. Measure of Multicollinearity – Variance Inflation Factor (VIF) and tolerance, formula and interpretation. Methods of reducing the influence of multicollinearity.**

## UNIT - V

**Autocorrelation: Disturbance term ( $u$ ) in econometric models and its assumptions, autocorrelated disturbances and their consequences on the model parameters, Detecting the presence of autocorrelation – hypothesis tests for autocorrelation - Durbin Watson test and its interpretation.**

**Practical/Lab to be performed on a computer using Statistical packages  
Conduct at least 6 Practicals from the following**

1. Problems based on estimation of General linear model.
2. Testing of parameters of General linear model.
3. Forecasting of General linear model.
4. Problems concerning specification errors.
5. Problems related to consequences of Multicollinearity.
6. Diagnostics of Multicollinearity.
7. Diagnostics of Autocorrelation.
8. Estimation of problems of General linear model under Autocorrelation.
9. Problems related to consequences Heteroscedasticity.
10. Diagnostics of Heteroscedasticity.
11. Estimation of problems of General linear model under Heteroscedastic disturbance terms.

**VIKRAMASIMHAPURI UNIVERSITY**

**(W.E.F 2020-21 ADMITTED BATCH)**  
**STATISTICS(WM)**  
**(SKILL ENHANCEMENT COURSES)**  
**SEMESTER – V**  
**Course 6C: ECONOMETRICS**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION – A**

**Answer any FIVE Questions**

**5 X 5 = 25M**

1. Define Econometrics. Explain the nature of Econometrics?
2. What is the model specification in Econometrics?
3. Define Multiple and Partial Correlation coefficients
4. Derive OLS estimator of the variance of error term and show that it is unbiased.
5. What are the sources and consequences of Heteroscedasticity?
6. Discuss various diagnostic tests of Heteroscedasticity
7. Explain how to overcome the problem of Multicollinearity?
8. What are the methods for reducing the influence of Multicollinearity
9. What are the sources and consequences of Auto correlation?
10. How to detect the problem of autocorrelation?

**SECTION –B**

**Answer any FIVE Questions**

**5 X 10 = 50M**

11. What are different steps in empirical Economic Analysis
12. Explain about data for Econometric Analysis
13. Explain two variable linear regression model and its estimation
14. Explain Gauss-Markoff theorem
15. Describe Goldfield-Quandt test for detection of Heteroscedasticity
16. Describe an estimation method of GLM under Heteroscedasticity error terms
17. Explain the nature, sources and consequences of Multicollinearity problem in a General Linear Model
18. Describe various diagnostic tests of Multicollinearity
19. Explain the Problem of Autocorrelation. What are its Uses.
20. Explain Durbin-watson test for detection of Auto-Correlation in a Regression model and discuss the limitations of the test

**VIKRAMA SIMHAPURI UNIVERSITY: NELLORE**  
**SEMESTER-WISE REVISED SYLLABUS UNDER CBCS, 2020-21**

**Four-year B.A. /B.Sc**

**Domain Subject: STATISTICS (WM)**

**SEMESTER-V**

**Course 7C: REGRESSION ANALYSIS**

**(Skill Enhancement Course (Elective), 05**

**CreditsMax. Marks: Theory :100 +**

**Practicals:50) (Hours: Teaching:75 hrs,**

**Training: 15 hrs)**

**Learning Outcomes:**

**After learning this course the student will be able**

1. To know about regression techniques, which are powerful tools in statistics,
2. To get an idea of Linear and Multiple Linear regression,
3. To learn about regression diagnostics, residual plots for visualization
4. To perform statistical tests of hypotheses on regression coefficients.
5. To study the structural stability of a regression model.
6. To learn the regression with qualitative independent and dependent variables by dummy variable technique.
7. To learn the selection of the best regression model.

**UNIT I**

**Simple Linear Regression:Simple Linear Regression Model. Least-Squares Estimation of the Parameters - Estimation of  $\beta_0$  and  $\beta_1$ , Properties of the Least-Squares Estimators and the Fitted Regression Model. Hypothesis Testing on the Slope and Intercept -Use of t Tests, Testing Significance of Regression and Analysis of Variance**

**UNIT II**

**Multiple Linear Regression:Multiple linear regression: Multiple Linear Regression Model. Estimation of model parameters: Least-Squares Estimation of the Regression Coefficients, Properties of the Least-Squares Estimators. Concept of residual, Residual plots. Test for Significance of Individual Regression Coefficients, and subsets of coefficients. Concept of coefficient of determination.**

**UNIT III**

**Regressions with Qualitative Independent Variables:Use of dummy variables to handle categorical independent variables in regression. Estimation of model parameters with dummy variables - Testing the structural stability of regression models, comparing the slopes of two regression models. Multiple linear regression with interaction effects.**

## UNIT IV

**Regressions with Qualitative Dependent Variables: Binary logistic regression with several independent variables, estimation of coefficients, evaluating the Odds Ratio (OR) and its interpretation. The concept of Piecewise linear regression, The Logit, Probit and their applications.**

## UNIT V

**Best Model: Selecting ‘Best’ regression model. All possible regressions –  $R^2$ , Adjusted  $R^2$ ,  $MS_{Res}$ , Mallow’s statistic. Sequential selection of variables – criteria for including and eliminating a variable – forward selection, backward elimination and stepwise regression(Concepts only)**

**Course 7C: REGRESSION ANALYSIS**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION – A**

**Answer any FIVE Questions**

**5 X 5 = 25M**

1. Explain about Simple Linear Regression
2. What are the properties of OLS estimators  $\alpha$ ,  $\beta$  and  $\sigma^2$
3. What are the assumptions of Multiple Linear Regression Model
4. Explain the concept ‘Coefficient of Determination’
5. What is Dummy variable technique?
6. What is Multiple Linear Regression with interaction effects?
7. Explain Comparison between Regression with qualitative dependent and independent variables
8. Explain the concept of Piece wise Linear Regression
9. Briefly explain How to select Best Regression Model
10. How do you interpret Mallow’s C p statistic

## SECTION –B

Answer any **FIVE** Questions

**5 X 10 = 50M**

11. Explain test for complete Regression
12. Explain tests of Significance of parameters using Least Square Estimation
13. What is BLUE? Explain the test of significance of Multiple Linear Regression Model?
14. Explain completely Multiple Linear Regression Model
15. Explain the estimation of Model parameters with dummy variables
16. How do you test the structural stability of regression model
17. What are limited dependent variable models- Explain
18. Explain logistic regression with estimation , also evaluate the odd ratio and its interpretation
19. Explain  $R^2$  Criteria and Adjusted  $R^2$  criteria for model selection
20. What is forward, Backward and stepwise Regression?

**BLUE PRINT/ PATTERN OF QUESTION PAPER  
( COMMON TO ALL PAPERS)  
(INSTRUCTIONS TO PAPER SETTER)**

**VIKRAMASIMHAPURI UNIVERSITY  
FOUR YEAR B.A./B.Sc DEGREE EXAMINATION  
STATISTICS(WM)  
(W.E.F 2020-21 ADMITTED BATCH)**

**Time: 3 Hours**

**Max. Marks : 75**

**SECTION - A**

**Answer any FIVE Questions :-**

**5 X 5 = 25 M**

1. Short answer question from Unit I
2. Short answer question from Unit I
3. Short answer question from Unit II
4. Short answer question from Unit II
5. Short answer question from Unit III
6. Short answer question from Unit III
7. Short answer question from Unit IV
8. Short answer question from Unit IV
9. Short answer question from Unit V
10. Short answer question from Unit V

**SECTION-B**

**Answer any FIVE questions :-**

**5 X 10 = 50M**

11. Essay type question from Unit I
12. Essay type question from Unit I
13. Essay type question from Unit II
14. Essay type question from Unit II
15. Essay type question from Unit III
16. Essay type question from Unit III
17. Essay type question from Unit IV
18. Essay type question from Unit IV
19. Essay type question from Unit V
20. Essay type question from Unit V

**Instruction to Paper Setter : Two short answer questions (5 Marks) and two essay questions (10 Marks) must be given from each unit.**

**PATTERN AND EVALUATION OF  
PRACTICALS**

**VIKRAMASIMHAPURI UNIVERSITY  
FOUR YEAR B.A./B.Sc DEGREE  
EXAMINATION  
STATISTICS(WM)  
(W.E.F 2020-21 ADMITTED BATCH)**

**Note:**This should be applied for all the semesters with effect from 2022-23

- 1) Minimum 6 practicals should be conducted in each paper**
- 2) 3 practicals should be given in the practical examination**
- 3) 2 practicals should be answered**
- 4) Marks allotment ( Total 50 marks)**
  - a) 2 practicals each with 15 marks = 30 marks**
  - b) Record = 10 marks**
  - c) Viva Voce = 10 marks**
